IMLAY SENDS ORE TO OGDEN SMELTER

Will Net Good Returns for Company in Which Salt Lakers Are Interested.

NEW 100-GALLON PUMP BEING INSTALLED ON 250

Arrangement Will Make Possible Development of the Mine at Greater Depth.

The Imlay mine of Humboldt, Nev., has just shipped a car of ore to the Independent smelter at Ogden. Judgin from the mine assays, it is expected that the car will prove an extremely valuable one. Work in the mine is progressing in a very satisfactory manner, according to the latest reports received from the mine.

Superintendent J. R. Turner is now busy installing a new pump on the 250-foot level. This pump was purchased upon recommendation of the president in his annual report about a month ago. The pump will handle over 100 gallons of water a minute. The pump will be in operation at the close of the present week. As soon as the water is under control sinking will be resumed, and when a satisfac-

will be resumed, and when a satisfactory depth has been obtained a station will be cut and the work of locating the ore on the new level will begin.

At the present time about lifteen men are employed about the mine. Just enough ore is being shipped at the present time to pay running expenses. The men not needed to assist in removing the ore are used on development work in the property. The ore body has been fairly well developed on the No. 1 level. Water, which will now be overcome, will no longer interfere with the dewill no longer interfere with the de-velopment work on the No. 2 level, while the sinking for greater depth is expected to ultimately prove up the ore body and show the exact condition exidized portion of the vein.

NEW ENGLAND EXPECTED TO RESUME OPERATIONS

It is rumored that after the meeting of the directors of the New England Gold and Copper Mining company, which will be held in Denver on the 15th of this month, the order will be given to Acting Superintendent Dave Cook to begin active operations on this property at once, says the Bingham Bulletin. Nothing of a definite nature has been heard of this, but Managing Director E. E. Abercromble of Boston will be in camp as soon as the Denver meeting is over, and he will then decide who will be in local charge as well as outlining the policy of what shall be done. As the price of lead has advanced very encouragingly during the past, two months and the New England is primarily a lead proposition, it is reasonable to believe that one extraction will be begun at once. The fact, too, that this property is the first in line to receive attention from the U. S. smelter when the furnaces are blown in would lead one to believe this to be correct.

SWANSEA EXTENSION CO. OF TINTIC ORGANIZED

The Swansea Extension Mining company of Tintic was organized Wednesday afternoon. The officers of the company are A. L. Thomas, president; G. W. Powers, vice-president, and Heber M. Wells, secretary and treasurer. The above, with Joseph Lipmann and C. L. Berry, form the directorate of the new company. The company is capitalized at \$100,000, representing 1,000,000 shares having a pay value of 10c a share. A total of 415,000 shares of stock is left in the treasury as working capital. The property controlled by the company extends from the old Swansea property to the Opex mine. It is thought that the old Swansea vein crosses the property of the company extensive development work will begin immediately to prove the vein.

Production of North Butte. Concerning the output and the smelting contract under which the North Butte is operating, the Boston News Bureau

is operating, the Boston News Bureau says.

It is stated that the April output of the North Butte was 4,100,000 pounds of copper, and that the May figures exceeded that amount. Since the company resumed full operations March I, its output has been approximately as follows in pounds: March 3,457,265. April. 4,100-600: May, estimated 4,200,000; total, three months, 11,707,265.

The management expresses confidence in its ability to continue the present record breaking output under normal conditions. Under the terms of the new smelling contract made by the North Butte with the Washoe smelter, which went into effect the first of this month, the company it is estimated, will save from \$35,000 to \$40,000 s month.

The directors in the annual report say: "The company has made with the Washoe Copper a new contract for smelting and treating our ores at Anaconda for a period of three years, commencing June 1, 1898. The contract is nuch more favorable to us, and secures to us largely increased returns from the ores delivered by us."

THE SALT LAKE SECURITY & Trust company has declared its regular semi-annual dividend at the rate of seven (7) per cent per annum, payable on July 1, 1998, at the office of the company, 24 Main street, Salt Lake City, Utah, to stockhohiers of record June 20, 1998.

BUSINESS DROPPING OFF ON THE STOCK EXCHANGE

A drop in the amount of business being transacted on the stock exchange was noted again Thursday. Sloux Con. was particularly unsteady, going down as low as \$1, but rising again to \$1.05. The tock was stronger in the morning than in he afternoon sales being recorded at figures as high as \$1.174. Iron Blossom was fairly steady throughout the day, but nearly all other stocks seemed weak, and as soon as the opportunity afforded

and as soon as the opportunity afforded itself, so much stock was offered that the quotation fell rapidity.

Swansea and South Swansea dropped somewhat remarkably, no apparent reports being circulated to cause this drop. Though the business is decreasing gradually, it is still almost half as great as it was when the excitement caused by Sloux hit the market.

During the day a total of 226,300 shares of stock, having a selling value of \$140,171.41, were sold.

The following were the closing transactions:

WILL STUDY THE SAN RAFAEL SWELL

Work Will Be Done in Southern Utah Under the Direction of Robert Forrester.

WILL SPEND TWO MONTHS IN WILDS OF EMERY COUNTY

Representatives of U. of U. Invited to Join the Geological Survey by Mr. Forrester.

A party of from ten to fifteen persons is being organized, under the direction of John Forrester, to make a geological survey in southeastern Utah. The party will consist of a group of surveyors and a group of geologists. Neither group has as yet been fully organized. Mr. Forrester stated that Dr. Fred J. Pack, Descret professor of geology of the University of Utah, had been invited to make the trip, and that Dr. Pack would, in all probability, be a member of the geological party which will follow the surveyors into the wilds.

The geological survey is being made at the instance of Robert Forrester, one of Utah's most prominent geologists. Mr Forrestor is one of the consulting geologists of the Utah Fuel company. The party will report to Mr. Forrester at Green River, where complete in-structions concerning the work will be

It is understood that the work of the geologists will be confined to a study of the San Rafael swell, the greater part of which lies in the unsurveyed part of Emery county. To the geologist, the

of which lies in the unsurveyed part of Emery county. To the geologist, the country is a grand one for study, but for others who are not fond of fresh air and mountain scenery the country, with its barren slopes, affords very little that is inviting.

The purpose for which Mr. Forrester is having the work done is not known by any one who is in the city at the present time. The work is not being done for the Utah Fuel company. In a general way, the district was covered several years ago by the United States geological survey, but no detailed work has since been done. Mr. Forrester is an authority on the igneous formations of the tertiary period found in central Utab. Likewise he is entirely familiar with the geological formations of Carbon county and those lying north of that district. He is known to be an enthusiast in working up the geology of the State; hence it might be assumed that he is doing the work from a purely scientific point of view, except that there is considerable expeuse attached to keeping a party in the field for at least two months.

there is considerable expense attached to keeping a party in the field for at least two months.

John Forrester is a recent graduate of the University of Utah. He has very kindly invited a few of the upper classmen of the mining school to go into the district with him. It is understood that several students have expressed a desire to make the trip. There will be no expense attached to making the trip for these students, and the two months of field work should give excellent material for a thesis, should the student desire to follow the subject further on returning to school. As the work will be done by experienced geologists, the trip will be a rare treat for those students who secure the opportunity of godents who secure the opportunity of go

ing into the field. New York Mining Stocks.

New York Letter.

Winona
La Salle
Zinc
Corbin
Newhouse
U. S. Smelting, com.

James A Pollock & Co.. bankers and brokers, 6 West Second South street, furnish the following, received over their private wire vesterday afternoon:

Walker Letter, New York—Market was very stagmant, and while it held firm there was little or no business. Traders did little, and there was no inducement to go into the market. The close was without feature. We look for a bull market for the rest of the week.

Raymond-Pioche.

Haymond-Ploche, adjoining the Ohlo-Kentucky of Ploche, has recently been organized. The officers of the company are O. W. Powers, president; Thomas Marioneaux, vice-president; J. W. McKinney, secretary and treasurer. These, with R. H. and Richard Chope, constitute the directorate. The company is organized with 1,000,000 shares of stock, of which one-fourth are left as treasury stock. reasury stock.

Metal Quotations. The following metal quotations were furnished by McCornick & Co. yesterday afternoon: Silver, 53%c; lead, \$4.35; copper, 12 7-16c.

FLORENCE LOOKS GOOD

Mining Engineer Expresses Himself Favorably After Looking Over Nevada Camp.

FLORENCE, Nev., June 11 .- Ray mond C. Hudson, a mining expert and engineer, generally familiar with conditions in the various mining camps of Nevada, has just completed an examination of the Florence district. Mr.

observed in the district; in fact, he was

so pleased that he has already invested so pleased that he has already invested in some property, the development of which he will now actively push.

In speaking of the district and the manner in which he was impressed by his observations, Mr. Hudson said:

"The Florence mining district has a great future. It shows great strength and permanency. Almost every showing I have examined during the last three days should be converted into a paying proposition. You have here

paying proposition. You have here only two smelting propositions at present. The Baker galena property is among the largest in the State. A phenomenal body of ore is already exposed. Indian Queon Consolidated—Cash on hand, \$7717.21; shares in treasury, 200,000.

Ibex Gold Mining—Cash on hand, \$0454.83; shares in treasury, 254,550.
Colorado—Bills payable of \$32, 352.44.

Iron Blossom—Cash on hand, \$9609.
It is shares in treasury, 126,789. We have sufficient ore on the 400-foot level to justify the building of ore bins.

Cover Paint Consolidated—Cash on the consolidated—Cash

free milling nature. The Rainstorm upon which much development has been done, is now destined to become a fa-mous mine. Owing to the fact that you have wood and water in abundance here, it makes it possible to mill these ores on the ground at a small cost. It is these facts that make a great im-pression with mining men. The highreport on this prop-pression with mining men. The high-grade ore shown here means much to the mining world. This is found in well-defined seams.

Ore and Bullion.

McCornick & Co., posted the following ore and builton receipts yesterday after-noon: Ore, \$10,000, builton, \$40,900. Ore Shipments.

The Taylor & Brunton ore sampler re-leased the following cars of ore yester-day: Utah, 5. SEE US NOW ABOUT YOUR WALLPAPEE

WE ARE ON THE GROUND Our headquarters are in Reno, Ne-ada. EVERY CAMP IS AT OUR

DOOR.

We are just close enough to all the Nevada mining camps to obtain all the news of the mines as soon as it happens, and just far enough removed from the mines to see things in their proper perspective and hot be carried away by local ardor. We are, besides, in touch with all markets by wire and know what is doing in all the markets as well as all the mines, all the time. That is why our market forecasts on particular stocks are so accurate.

News of impending moves in Nevada issues reach us almost daily, and our clients are in position to command all of this information by mail or wire whenever requested.

We execute orders for the purchase and sale of listed stocks for one per cent commission.

Our confidential advices to regular clients are of great value to them, and the one per cent covers a general service that is hardly matched elsewhere. We carry all active listed Nevada stocks for a period of six months on a margin of 33 1-3 per cent of the actual cost, plus one per cent commission for buying and interest charges at the rate of 8 per cent per annum on debit balances.

Stocks are received as collateral

Stocks are received as collateral against purchases, in lieu of cash, whenever desired, valuation being made at 66 2-3 per cent of the market valua. Loans at 8 per cent per annum.
